Freight Logistics

- Fast delivery of time sensitive freight
- Express imports by road and air
- Bespoke logistics and shipment management solutions

CitySprint does not operate its own airline fleet, is not restricted by a single flight timetable and has flexibility in its choice of carrier. This means that CitySprint is able to offer customers later collection times with no impact on the required delivery time. CitySprint uses its own extensive courier fleet to make collections and deliveries within the UK and its worldwide partner network to make collections and deliveries outside the UK.

CitySprint's International Customer Services team is experienced, knowledgeable and is on hand to discuss any specific requirements. Tariffs are simple with no hidden extras or surcharges. CitySprint OnLine offers customers a fast and simple way to make bookings, track consignment progress and produce detailed shipment management reports. CitySprint OnLine also offers customers the capability to print Air Waybills and Pro-Forma invoices.

CitySprint focuses on offering a secure, flexible and personal service, ensuring that each consignment is proactively tracked from collection through to delivery. Proof of delivery is provided automatically for every shipment.

CitySprint is an excellent choice for companies looking for a total courier service solution or simply a SameDay Courier, NextDay Courier, International Courier or Specialist Services provider.
